## IMPORTANT SAFETY RECALL

### NHTSA Recall 20V-720

This notice applies to your vehicle, [REDACTED]

DECEMBER 2020

Dear Customer,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Your vehicle [REDACTED] 2020 model year Isuzu N-Series is involved in safety recall NHTSA 20V-720.

#### WHAT IS THE CONDITION?

Isuzu Motors Limited has decided that a defect, which relates to motor vehicle safety, exists in certain 2020MY N-Series crew cab vehicles with 6.6L gasoline engines. In the subject vehicles, the positive cable connecting the battery to the starter was too long. Depending on the installation positioning, the cable may be routed too close to the right-side exhaust pipe. Over time, heat from the exhaust pipe may cause the conduit and insulation to deteriorate, which may expose the wires and lead to the potential for a short circuit. Exposed wires could corrode and/or short circuit, resulting in a no-start condition or a thermal event, increasing the risk of a crash or fire.

#### WHAT WE WILL DO

Isuzu dealers will adjust the positive cable away from the exhaust pipe. This service will be performed **free of charge**.

#### WHAT YOU SHOULD DO

We recommend that you contact your Isuzu dealer to schedule an appointment. Although not necessary, please present this Owner Notification Letter at the time of your appointment or refer to Campaign Service Bulletin CB20-N-004A. We estimate that the repair may take up to 18 minutes to perform. However, additional time may be necessary due to the dealer's schedule. To locate the nearest Isuzu dealer you can visit our website at [www.isuzucv.com](http://www.isuzucv.com) or contact our Customer Relations Department at the number listed below.
