**NHTSA RECALL 20V-759**

Dear Titan Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Nissan has decided that a defect which relates to motor vehicle safety exists in certain Model Year 2020 Nissan Titan vehicles. Our records indicate that you own or lease the Nissan vehicle subject to this recall as identified by the VIN on the inside of this notice.

**Reason for Recall**  
**Motivo del Retiro**

On certain vehicles, the engine control (EGI) harness might have been assembled incorrectly and may have left an exposed wire. In this condition, an electrical short can occur and may cause abnormal engine and transmission performance. This short might also affect the fuel pump power supply, potentially causing an engine stall while driving without the ability to restart; which may increase risk of a crash. In addition, the short may cause harness thermal damage that could potentially cause a fire, which may increase risk of injury.

**What Nissan Will Do**  
**Qué Hará Nissan**

Your Nissan dealer will inspect and remedy the EGI harness. If visible damage is found during the inspection, the entire harness will be replaced. This free service should take up to one and a half (1.5) hours to complete, but your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.
