Dear Jared Fisher,

This notice is being sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

PJ Trailers Manufacturing, Inc. (PJ Trailers), has concluded that a defect, which relates to motor vehicle safety, exists in certain 2021 PJ Trailers Models (C4, U6, U8, UC, UL). A failure of the hub subassembly on the Idler Axle from Dexter Axle could result in accidental damage to include personal injury, death and/or property damage.

Your trailer has been identified as one that is included in this recall. You are advised **not to use the trailer for any purpose and to immediately contact PJ Trailers to schedule the required inspection and potential axle replacement (only performed if the inspection fails)**. The defect will be remedied by your authorized PJ Trailers dealer or representative by inspecting the axle hub for the inner bearing presence. If the inspection fails (i.e., inner bearing is missing) the dealer will replace the axle. The inspection will take approximately 10 minutes to perform and if the inspection fails, the axle will be replaced, which will take about 1 hour to complete. However, additional time may be required depending on how dealer appointments are scheduled and processed. To make the appointment to schedule the necessary inspection and potential axle replacement, **which will be performed at no charge to you**, please do the following:
