Dear General Motors Customer:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

General Motors has decided that a defect, which relates to motor vehicle safety, exists in certain 2010–2015 and 2017 model year Buick Enclave vehicles; 2010–2015 and 2019 model year Chevrolet Traverse vehicles; and 2011– 2014 and 2016 model year GMC Acadia vehicles. As a result, GM is conducting a safety recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

IMPORTANT

- Your vehicle is involved in GM safety recall N202321200.
- Schedule an appointment with your GM dealer.
- This service will be performed for you at **no charge**.

Why is your vehicle being recalled?

One or two of the weld nuts that secure the left roof-rail airbag to the vehicle might be damaged, out of position, or missing. If the roof-rail airbag is not properly secured to the vehicle, the airbag may not perform as intended, increasing the risk of injury in certain crash conditions.

What will we do?

Your GM dealer will inspect roof-rail airbag attachments and provide or replace any found to be missing, damaged or out of position. This service will be performed for you at **no charge**. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the actual inspection and service correction time of approximately 2 hours.

What should you do?

You should contact your GM dealer to arrange a service appointment as soon as possible.

Did you already pay for this repair?

Even though you may have previously had repairs for this condition, you will still need to take your vehicle to your dealer for additional repairs.
