NHTSA RECALL 21V-286

Dear Rogue Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Nissan has decided that a defect which relates to motor vehicle safety exists in certain Model Year 2021 Nissan Rogue vehicles. Our records indicate that you own or lease the Nissan vehicle subject to this recall as identified by the VIN on the inside of this notice.

Reason for Recall
Motivo del Retiro

Due to a manufacturing error at the supplier, certain Rogue vehicles may be missing an internal bushing in the rear left and/or right brake caliper assembly. Without the bushing in place, the O-ring seal can move and become deformed, resulting in a brake fluid leak path. In this condition, normal application of the brakes can lead to a brake fluid leak that may cause an electrical short. . The brake fluid leak can cause reduced braking performance without warning, which could increase the risk of crash. When a leak occurs, the red brake warning light in the center of the dash meter may illuminate.

What Nissan Will Do
Qué Hará Nissan

Your Nissan dealer will use a barcode scan tool to scan the VIN and also scan the QR code on both left and right rear brake calipers. If a caliper serial number is confirmed to be affected, they will replace it. The inspection and/or remedy will be completed at no cost for parts or labor and could take up to two (2) hours depending on rear caliper serial number applicability (none, left-rear, right-rear, or both) identified in the inspection. The dealer may require the vehicle for a longer period of time based upon the dealer's work schedule.
