Dear valued Lamborghini Sales and Service Manager,

In the course of continuous product monitoring and internal tests, Automobili Lamborghini S.p.A. has determined that a defect that relates to motor vehicle safety exists in certain 2021 Lamborghini Urus.

On the affected vehicles, there is a possibility that cracks could occur on the running surface of the cylinder 6' bore.

During engine operation, a crack in the bore can lead to an impaired contour of the piston's running surface. If this occurs, there is potential for engine damage, loss of power without warning, and oil leakage from a damaged engine block could occur which could increase the risk of a crash or fire.

For the reasons listed above, in a precautionary manner, Automobili Lamborghini decided to launch a recall campaign to rework the involved cars. The repair instructions are now be available on the HUB section "Service and Recall Campaigns" as well as on LIASS.

In order to further support you in answering questions to your customers, we are attaching the FAQ (Frequent Asked Question) you must follow.

Since these activities are extremely important, we are confident you will make every effort to ensure that the vehicles are repaired in the shortest time possible.
