Re: Missing CY2021 Recall Information

Dear Ms. Lepper:

PACCAR received NHTSA's notice regarding missing information in recall 21V-391. The notice requests a written explanation for owner notification letters that appeared to have been issued late, past the 60th day after the 573 report was filed. This recall is an engine recall that Cummins is managing under equipment recall number 21E-032. Cummins timely mailed the customer notification letters and uploaded them under its recall 21E-032. We requested copies and uploaded a duplicate letter under our recall 21V-391.

Very truly yours,

s/Pamela S. Tonglao
