**NHTSA RECALL 21V-402**

Dear Nissan GT-R Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Nissan has decided that a defect which relates to motor vehicle safety exists in some 2021 Model Year Nissan GT-R vehicles. Our records indicate that you own or lease the Nissan vehicle identified by the VIN on the inside of this notice.

**Reason for Recall**  
**Motivo del Retiro**

Due to a manufacturing issue, the front steering knuckles on certain GT-R vehicles may not meet design specification. In this condition, if the front steering knuckle receives a strong impact (such as when hitting a curb), the steering knuckle may deform. As a result, the steering wheel may become off-center, impairing the driver's ability to steer the vehicle, increasing the risk of a crash. In the worst-case condition, the damaged steering knuckle may cause wheel separation from the vehicle, also increasing the risk of a crash.

**What Nissan Will Do**  
**Qué Hará Nissan**

Once parts are available beginning in September 2021, GT-R customers should take their vehicle to a certified Nissan GT-R dealership. The GT-R dealer will inspect the casting stamp of the front steering knuckles. If any of the components are affected, the dealer will replace the affected parts. This service, which is conducted at no charge to you for parts and labor, could take up to approximately eight (8) hours to complete if parts replacement is required. However, your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.

**What You Should Do**
