Subject: Safety Recall 69CK -Airbag Control Module Fixation Holes

Dear Volkswagen Owner,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Volkswagen has decided that a defect, which relates to motor vehicle safety, exists in certain 2020-2021 model year Volkswagen vehicles. Our records show that you are the owner of a vehicle affected by this action.

What is the issue?

During rework at the factory, the airbag control module fixation holes were enlarged in order to allow correct assembly to the vehicle body. Because of this, the airbag may not deploy correctly in a crash, or may deploy unintendedly while driving, leading to an increased risk of injury.

What will we do?

To correct this defect, your authorized Volkswagen dealer will replace the airbag control module after bending the stud with a bending tool. This work will take about one hour to complete and will be performed for you free of charge. Please keep in mind that your dealer may need additional time for the preparation of the repair, as well as to accommodate their daily workshop schedule.

What should you do?

The recall remedy will be available starting on September 10, 2021. Please contact your authorized Volkswagen dealer without delay to schedule this recall repair. To set up an appointment online, please visit www.vw.com/find-a-dealer.

Precautions you should take

If there is an issue with the airbag control module, the airbag malfunction indicator light will illuminate. Owners are advised to contact an authorized dealer without delay to have the vehicle inspected if the airbag light illuminates, and also are asked to ensure they are familiar with the airbag system information in the owner's manual.
