Chronology :

On November 13th, 2020 Northwood received a notice dated November 9, 2020 that the Dometic Corporation was filing a safety recall on model S31, R1731, and R2131 cooking stoves. Northwood Director of Warranty Matt Turley was informed that Dometic would be using the outside recall service, Stericycle to handle this recall. After much back and forth via email and voicemail, on June 15th, 2021 Mr. Turley turned the matter over to Director of Purchasing Lance Rinker. Rinker contacted NHTSA representative Choon Lee via email and was then contacted by Mr. Lee by telephone. The result of this communication was that Northwood did in fact have to submit a recall report before Dometic-Stericycle could begin the process of notifying customers and submit quarterly tracking information. Rinker then started the process of collecting and matching Dometic stove serial numbers with the corresponding Northwood RVs they had been installed in. Additionally, Rinker compiled a list of the dealers said units were sold to as well as retail customer names, addresses and contact numbers for Dometic-Stericycle's use for mailing out notices and tracking purposes. This process was completed at the time of this report (July 6th, 2021) and once submitted, Northwood will begin generating a customer letter for NHTSA approval.

Description of Remedy :

Description of Remedy Program : Dometic Authorized service centers will perform the recall remedy at no charge to the current owner. Manifold bolt and valve seal replacement.

Recall Schedule :

Description of Recall Schedule : Upon NHTSA's approval of this report, Northwood will submit a recall notice on Northwood Manufacturing Incorporated letterhead to Dometic-Stericycle. Northwood will also provide a list of current owners' names, mailing addresses and contact phone numbers. Dometic-Stericycle will report to Northwood after each quarter the number of units that have received the approved remedy for the next six quarters per NHTSA mandate.
