**Subject: Compliance Recall 69CQ – Rear Outboard Seat Belts**

Dear Volkswagen Owner,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Volkswagen has decided that certain 2021 model year Volkswagen I.D.4 vehicles fail to conform to Federal Motor Vehicle Safety Standard No. 208 *Occupant crash protection*. Our records show that you are the owner of a vehicle affected by this action.

**What is the issue?**

Vehicles may have received an incorrect seat belt assembly not released for the U.S. market. Only the outer rear seats are potentially affected. The potentially incorrect seat belt assemblies do not have the automatic locking retractor (ALR) function required by FMVSS 208 implemented.

This noncompliance does not impact the compliance or functionality of the seat belt assemblies with respect to their normal use by adult passengers or use of the LATCH system to secure child restraint seats. With child restraint seats for which the vehicle owner elects to use the seat belt to secure the child restraint seat instead of the LATCH system, if the seat belt is not lockable so that the seat belt assembly can be used to tightly secure the child restraint seat, there is an increased risk of injury in a crash to the occupant of the child restraint seat.

**What will we do?**

To correct this noncompliance, your authorized Volkswagen dealer will inspect and, if necessary, replace one or both rear outboard seat belts. This work will take up to an hour to complete and will be performed for you free of charge. Please keep in mind that your dealer may need additional time for the preparation of the repair, as well as to accommodate their daily workshop schedule.

**What should you do?**
