<p>Vehicles included in this recall are equipped with an all-wheel drive powertrain and have a specific software version installed in the engine control unit that, under specific conditions (high ambient temperatures, high engine load, A/C on), may lead to a stalling condition when coming to a stop. The engine can be immediately restarted manually. An engine that stalls while coming to a stop (20 MPH) may increase the risk of a crash.</p>												
			What is the repair for Safety Recall 24HH?	<p>To correct this defect, your authorized Volkswagen dealer will update the engine control unit (ECU) software. This work will take about an hour to complete and will be performed for you free of charge. Please keep in mind that your dealer may need additional time for the preparation of the repair, as well as to accommodate their daily workshop schedule.</p>
