Subject: Chevrolet Bolt EV and Bolt EUV Reassigned Orders

As promised, we want to continue to keep you up to date with information on the Chevrolet Bolt EV and Bolt EUV.

Earlier, we communicated limited production will resume starting the week of November 1. Today we are informing you about reassigned orders for this limited production of vehicles as you may notice a change to units that were in system. Upon resumption of retail production, dealers impacted by the reassignment of orders will receive replacement allocation.

The stop-sale order for Bolt EV/EUVs in dealer inventory remains in place. This is a limited production run and allocation.

As a reminder, battery module replacements for customers impacted by the recall began at dealerships earlier this month and remains the priority. We will continue to adjust Orion's production schedule moving forward to best support the recall.

We will update with more information as it becomes available
