IMPORTANT SAFETY RECALL

Seat Belt Locking Retractor

Dear [Name],

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

FCA US has decided that certain [2021 Model Year (VF) Ram ProMaster] vehicles fail to conform to Federal Motor Vehicle Safety Standard (FMVSS) No. 208 S7.1.1.5 requires that, "Each designated seating position, shall have a seat belt assembly whose lap belt portion is lockable so that the seat belt assembly can be used to tightly secure a child restraint system". It is extremely important to take steps now to repair your vehicle to ensure the safety of you and your passengers.

WHY DOES MY VEHICLE NEED REPAIRS?

The seat belts in your vehicle ^[1] may contain seat belt retractors with suspect Automatic Locking Retractor ("ALR") levers that may affect the ALR function of the seat belt retractor. The ALR may deactivate earlier than intended and a child seat may not tightly secure to the vehicle seat.

HOW DO I RESOLVE THIS IMPORTANT SAFETY ISSUE?

FCA US will repair your vehicle ^[2] free of charge (parts and labor). To do this, your dealer will inspect the suspect seat belts and replace as needed. The estimated repair time is about one hour. In addition, your dealer will require your vehicle for proper check-in, preparation, and check-out during your visit, which may require more time. Your time is important to us, so we recommend that you schedule a service appointment to minimize your inconvenience. Please bring this letter with you to your dealership.
