This notice applies to your Hyundai, VIN:

Dear

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Hyundai has decided that a defect, which relates to motor vehicle safety, exists in your vehicle, with the VIN shown above. Hyundai is initiating a safety recall to repair a condition involving the front seat belt pretensioners in certain 2021 Elantra, 2021 Elantra Hybrid, and 2021 Venue vehicles in the U.S. and Canada.

The purpose of this letter is to explain what the recall is about and to keep you informed of Hyundai's recall implementation plan. We are currently making preparations to implement the safety recall remedy which when available, will be performed at no cost to you. We will send you another notification when the remedy is available.

What is the problem?

The front driver-side and/or passenger-side seat belt pretensioners in the subject vehicles were installed from a suspect production lot containing pyrotechnic-type pretensioners that may deploy abnormally and explode during a crash. At the time of this filing, the cause of the abnormal deployment is unknown. Hyundai is recalling vehicles equipped with pretensioners produced within the same production lot and will conduct a detailed part return analysis. The part inspections and investigation will actively continue to determine if a specific root cause and defect trend exists. An abnormal pyrotechnic pretensioner deployment could cause the pretensioner to explode, and project metal fragments into the vehicle occupant compartment, which may result in injury to vehicle occupants.

What should you do in the interim?

We appreciate your patience. Hyundai is currently making preparations to implement the recall remedy. You will receive a second notification letter when the remedy is available. For updated information regarding this recall, please visit:
