

New Safety Recall Advanced Communication – Y83

FCA US LLC (FCA US) has announced a safety recall on certain 2020 Model Year (GA) Alfa Romeo Giulia vehicles.

REASON FOR THIS SAFETY RECALL

Federal Motor Vehicle Safety Standard ("FMVSS") No. 110 S4.2.1.1 requires that, "The vehicle maximum load on the tire is not to be greater than the applicable maximum load rating as marked on the sidewall of the tire." Subject vehicles are equipped with tires that do not meet the required load rating. A driver may rely on the incorrect load index and may overload the vehicle, which can cause a vehicle crash without prior warning.

The condition described above does not comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 110 - Tire selection and rims.

SERVICE ACTION

FCA US will conduct a voluntary safety recall to replace the incorrect tires with tires that meet the required load index and update the Owner's Manual with the correct load index values. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 4th Quarter of 2021.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
