Country	Beginning Model Year	Ending Model Year	Vehicle					
USA	2022	2022	TIGUAN					
			What is the safety concern for Safety Recall 19Q4?	The brake pipe nut at the right front wheel well may not be torqued to the proper specification. If the nut becomes loose, brake fluid may leak. This in turn can result in the vehicle requiring a longer braking distance, increasing the risk of a crash.				
			Are there any precautions I should take because my vehicle is part of Safety Recall 19Q4?	Vehicle driver may see the brake warning light illuminate just after significant brake fluid loss. If this happens, owners are advised to contact an authorized Volkswagen dealer without delay to make arrangements to have the vehicle inspected/repaired.				
			What is the repair for Safety Recall 19Q4?	To correct this defect, your authorized Volkswagen dealer will inspect and, if necessary, torque the affected nut to the proper value.				
			When will the repair for Safety Recall 19Q4 be available?	Repairs for this recall have begun. Please contact your authorized Volkswagen dealer without delay to schedule this recall repair. To set up an appointment online, please visit www.vw.com/find-a-dealer .
