## IMPORTANT RECALL CAMPAIGN INFORMATION

Please see the attached documents related to the campaign listed above

Campaign No. :	Campaign Desc. :	Replace Front Axle Brakes
2021120005	VS3BRESCHE	
This is to notify you of an initial Recall Campaign to replace the front axle brakes on 1 MY20 Mercedes-Benz Sprinter van. The recall campaign will be visible on the www.safercar.gov website and may generate questions from customers. All affected VIN will be flagged as “OPEN” in VMI		
Background		
Issue	Mercedes-Benz AG (“MBAG”), the manufacturer of Mercedes-Benz vans, has determined that on one Mercedes-Benz Sprinter vehicle, (platform 907 -VS30), the front axle was equipped with brake discs intended for a 3.5t GVWR Sprinter instead of the brake discs for a 5t GVWR Sprinter. The brake discs for vehicles with 3.5t Gross Vehicle Weight Rating (GVWR) are not designed to withstand the thermal load experienced by vehicles with 5t GVWR during multi-stop braking and downhill driving. For a vehicle equipped with the 3.5t GVWR under those special operating conditions, braking distance might increase in some instances, which could increase the risk of a crash.	
What We’re Doing	MBUSA is conducting a voluntary recall. An authorized Mercedes-Benz Sprinter dealer will exchange the incorrectly mounted 3.5t brake discs and pads on the front axle for the correct version (5t) on the vehicle affected.
