

New Safety Recall Advanced Communication – Y79

FCA US LLC (FCA US) has announced a safety recall on certain 2021 Model Year (WL) Jeep® Grand Cherokee and 2022 Model Year (WS) Wagoneer/Grand Wagoneer vehicles.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been built with incorrect Occupant Restraint Controller (ORC) module software. The airbag warning indicator may not illuminate to notify the operator of possible compromised airbag system functionality. If specific ORC internal faults are active, then a diagnostic trouble code (DTC) will not be set and the airbag warning indicator may not illuminate. The internal faults will disable deployment of both the driver and passenger airbag squib and knee airbags. Reduced occupant protection in the event of a crash may result in an increased risk of injury to motor vehicle occupants.

SERVICE ACTION

FCA US will conduct a voluntary safety recall to reprogram the ORC module with correct software. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 4th Quarter of 2021.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
