Dear Toyota Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Southeast Toyota Distributors, LLC has decided that certain Model Year 2022 Toyota 4Runner vehicles equipped with Southeast Toyota accessory fog lights fail to conform to Federal Motor Vehicle Safety Standard No. 108, "Lamps, Reflective Devices, and Associated Equipment."

What is the condition?

On certain 2022 Toyota 4Runner vehicles with Southeast Toyota accessory fog lights, due to a wiring harness misapplication, the driver side headlamp does not switch from low to high beam function when the high beam switch is activated. The inability to use the high beam when needed, could reduce the driver's visibility, increasing the risk of a crash. This condition does not affect the passenger side headlamp, or any of the vehicle's marker lamps, turn signals or fog lamps.

What is Southeast Toyota Distributors, LLC going to do?

At no cost to the customer, a Toyota dealer will install an updated wiring harness for the accessory fog lights. The repair will take approximately 90 minutes or less. However, depending upon the dealer's work schedule, it may be necessary to make the vehicle available for a longer period of time. This repair is available to you at no cost.
