

IMPORTANT SAFETY RECALL

Re: RV Aftermarket Products

Valued Enerco/Mr. Heater Customer,

This letter is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Enerco has decided that a defect which relates to motor vehicle safety exists in certain brass female quick disconnects manufactured by one of our related companies which sells the components to RV OEM Manufacturers.

We have become aware in the past few weeks that the component may develop cracks in the brass when fastened via the female pipe threads. After an exhaustive effort to identify the problem and the source, we have determined the crack is not being introduced during the manufacturing process within our facility so the issue has escaped our quality inspections. The root cause for this crack has been identified as contamination and/or porosity in the brass from our 2nd tier brass sub-supplier. Our records at this point indicate the relevant window for products that may contain cracks were shipped between July 1, 2021 and April 20, 2022.

The affected components are a Mr. Heater 1/4 Quick Connector Set with Shutoff Valve and Excess Flow Plug-Quick Disconnect, Part Number F276181, and a 1/4 Quick Connector Hose Assembly, Part Numbers F271806 and 71806. If a crack develops in a quick disconnect, propane could leak outside the vehicle. A propane leak in the presence of an ignition source could cause a fire outside the vehicle.

We have reported this situation to NHTSA and wanted you to be aware that your company is referenced in our NHTSA filing. Our team will reach out in order to coordinate the return of inventory you have in your warehouse. We are working tirelessly on a replacement component that will be available under a new part number and our team will be in touch once that is available.

If any consumers contact you about this recall, please direct them to call 1-800-964-4328.

If you believe that Enerco has failed to remedy this defect adequately, you may contact NHTSA at: Administrator, National Highway Traffic Safety Administrator; 1200 New Jersey Avenue, SE; Washington, DC 20590. Alternatively, you may call the DOT Safety Hotline toll-free at 1-888-327-4236 (TTY: 1-800-424-9153) or go to www.safercar.gov.

Enerco is required to inform you that it is a violation of federal law for any dealer, distributor or retailer to sell or lease any new quick disconnect covered by this recall notice.

We apologize for the inconvenience this causes and are working quickly to develop a new robust design that will overcome any future issues.

A handwritten signature in black ink, appearing to read 'Jeff Bush', with a stylized, overlapping 'B' and 'S'.
