NHTSA RECALL 22V-024

Dear Rogue Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Nissan has decided that a defect which relates to motor vehicle safety exists in certain Model Year 2014-2016 Nissan Rogue vehicles. Our records indicate that you own or lease the Nissan vehicle subject to this recall as identified by the VIN on the inside of this notice.

Reason for Recall

Motivo del Retiro

On certain Rogue vehicles, if water and salt collect in the driver's side foot well, it may wick up the dash side harness tape and enter the connector. If this occurs, the dash side harness connector may corrode and possibly cause issues such as driver's power window or power seat inoperative, All-Wheel Drive (AWD) warning light ON, battery discharge, and/or thermal damage to the connector. The corrosion could potentially lead to a fire, which may increase risk of injury.

What Nissan Will Do

Qué Hará Nissan

Parts are now available to repair your vehicle. Your Nissan dealer will inspect your vehicle and perform the appropriate repair below:

- If corrosion is present on either the main harness or the body harness connectors, the dealer will remove the harness tape and harness covering, replace both connectors and apply white lithium grease to the connectors.
- If corrosion is not present on either of the connectors, the dealer will remove the harness tape and harness covering and apply white lithium grease to the connectors.

This service will be conducted at no charge to you for parts and labor, and may take up to two (2) hours to complete if your harness connectors require replacement. However, your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.
