

ANA1 Recall campaign - Check suspension alignment on the rear axle and correct if necessary

Safety Recall ANA1 - Check suspension alignment on the rear axle and correct if necessary

ID Number	ANA1
Models	Cayenne (9YA / 9YB)
Model Years	2021 - 2022
Number of VINs affected	TBD
VIN List	Pending
Issue Description	<p>Only vehicles that were subject to Recall Campaign AMA9 are affected.</p> <p>Suspension alignment of the rear axle was not originally included in the remedy procedure for Recall Campaign AMA9. This may result in alterations in the wheel alignment, and in some instances, result in premature and uneven wear of the tires.</p>
What should Dealers do?	Please do not deliver affected vehicles in dealer inventory until further notice. Customer vehicles will be recalled to the dealer to have the revised remedy performed.
What will Porsche do?	Additional information will be provided as soon as possible.
TI Number	TI will be released at a later date.
Customer Reactive Statement	The safety of anyone travelling in one of our cars is our highest priority. For this reason, we regularly review the quality of our work. We previously recalled a number of model year 2021 and 2022 Cayenne vehicles to replace lock nuts that were not up to our stan-

dards on the trailing arms of the rear axles. It has since come to our attention that in some of these cases, this remedy may have resulted in rear axles being out of alignment, which in turn could cause excess tire wear. While no incidents have been recorded, we will check the suspension alignment on affected vehicles and adjust as necessary, as well as replace tires if there is premature wear due to this issue.

Customers whose cars are affected will be contacted in due course for the work to be carried on a date convenient to them. There will be no charge for this. In the meantime, their cars remain safe to drive, although we recommend that customers monitor their tires for any excess wear in the meantime.
