INTERIM NOTICE

ATTENTION: ALL DEALER PRINCIPALS

This is an INTERIM notice as Kia is currently working on obtaining the remedy part. The purpose of this communication is to keep you informed of Kia's recall implementation plan. Kia will send you another notice as soon as the remedy part becomes available.

Kia America, Inc. is conducting a Safety Recall Campaign on certain 2013-2014 MY Optima vehicles manufactured at Kia Georgia from November 15, 2012 through December 18, 2013 that received the heat protective tape repair under NHTSA Recall 20V100 (Kia internal campaign no. SC187).

The remedy for previous recall 20V100 may not have been properly performed in all cases by dealers. In some cases, the low-pressure fuel tube may not have been properly repaired with heat protective tape after inspection revealed no damage or leak. In some other cases, the low-pressure fuel tube was repaired with heat protective tape instead of being replaced even though damage might be present. In either case, a subsequent fuel leak can occur. Leaking fuel increases the risk of a fire.

When the remedy part becomes available, dealers will replace the low-pressure fuel tube with a new improved one. The remedy part has a different tube material with a protective sleeve and connector structure for increased stress and heat resistance.

Your Service Manager was sent a copy of the interim owner notification letter and a Q&A guide for recall questions both of which describe the issue and information on how to access the list of affected vehicles. Kia will start mailing interim notices to the affected vehicle owners on **April 15, 2022**.
