Dear Ms. Carlson:

Volkswagen hereby submits the following chronology associated with the subject recall.

Additional Chronology of Defect

November – December 2022: In further analyzing the field situation in every detail the scope and measures were discussed again with the tank supplier. The tank supplier was able to provide a list of all tanks before the last optimization. On this basis all associated VINs could be identified.

December 19, 2022: The Audi Product Safety Committee decides to update the recall population based on the list of all tanks equipped with a fuel level sender before the tolerance optimization.

Please contact me if you require any additional information or have any questions related to this information.

Sincerely,

Christopher T. Sandvig
