## Description of Defect :

**Description of the Defect :** The heat shield beneath the storage compartment and above the exhaust system needs to be extended to protect the storage compartment from the heat of the exhaust system. Without the extended heat shield the compartment may melt.

**FMVSS 1 :** NR

**FMVSS 2 :** NR

**Description of the Safety Risk :** Without proper shielding from the exhaust system heat, the storage compartment may melt, increasing the risk of a fire hazard.

**Description of the Cause :** The heat shield designed by Jayco is not large enough to protect the storage compartment from the heat of the exhaust system. Ford Emissions Certification requires that the Final Stage Manufacturer is responsible for providing thermal protection (e.g. underbody heat shields) for any structure and equipment added to the Incomplete Vehicle.

**Identification of Any Warning that can Occur :** Vehicle owners may notice elevated heat in the storage compartment or melting of the compartment.
