Subject: **Front Sprocket Wear - Potential Loss of Propulsion**

No. **2019-10**

IMPORTANT

What should you do?

- Do not sell or deliver any involved vehicle that you have in stock as federal law requires you to complete the recall service on these vehicles before retail delivery.
- Unregistered vehicles cannot be sold until the campaign is performed.
- Contact all of your customers who purchased an affected vehicle and inform them about this Safety Recall notice.

MODEL YEAR	MODEL	ADMISSIBLE UNITS
2015 2016 2017 2018 2019 (only some specific VIN)	Spyder® F3 Spyder® RT	Go to BOSSWeb/Warranty/Campaign Monitoring to know the quantity of units in your inventory impacted by this campaign

IMPORTANT

- When a vehicle comes in for service, always type the VIN in Knowledge Center to check for pending campaigns or alerts.
- When performing any work on a vehicle, it is good practice to connect it to BUDS2 to ensure that all needed updates are done.

PROBLEM

The front sprocket may be defective and may be subject to premature wear. Over time, the vehicle could lose propulsion. If the vehicle loses propulsion, there is an increased risk of a crash.

SOLUTION

The repair is NOT yet available. Information about the repair will be announced before August 30, 2022. This bulletin will be revised.

In the meantime, BRP will be offering an interim repair procedure in a separate Bulletin. The procedure will act as a temporary solution until the front sprocket replacement is available, as all front sprockets will need to be replaced. The interim procedure will be available on June 30, 2022 at the latest.

NOTE: The parts for the repair will gradually be available in a very limited quantity over an extended time period, due to supply chain limitations. BRP will keep you informed in the *EXPERIENCE NEWSLETTER* of parts availability status.

WARRANTY

The front sprocket replacement solution will be communicated when available.

The claiming procedure will be clarified when the solution becomes available.
