

## Questions and answers

### Lamborghini Huracan EVO and STO model year 2022.

#### “Door Handle Safety Clip”

##### ■ **What is the issue with the affected vehicles?**

The left door outside handle may not have been properly assembled. The safety clip of the cable that unlatches the door when the outer handle is pulled may have not been properly positioned. As a result, over time, the cable could become loose and the left-side doors may not be able to be opened from outside of the vehicle.

##### ■ **What is the cause of this condition?**

Due to a production deviation during the assembly of the component, the security lock of the Bowden cable may have not been properly engaged.

##### ■ **What effect does the condition have?**

It might not be possible to open the unlocked door on the left side by using the outside door handle, posing an entrapment risk. This failure could lead to the inability to operate the handle from outside of the vehicle which, in the event of an emergency, may increase their risk of injury. The door can be opened from inside at any time.

##### ■ **How can the condition be identified?**

The customer will not receive an advance warning due to the nature of the failure mechanism.

##### ■ **Is there any risk for the car occupants?**

Automobili Lamborghini S.p.A. is not aware of any accidents or other incidents resulting in injury to a person or damage to property.

##### ■ **Which vehicles are affected?**
