Subject: FCCC S2G and TBB Saf-T-Liner C2 LPG Engine Stall

This notice is sent to you in accordance with the requirements of the *National Traffic and Motor Vehicle Safety Act*.

Daimler Truck North America LLC (DTNA), on behalf of its wholly owned subsidiaries, Freightliner Custom Chassis Corporation and Thomas Built Buses, has decided that a defect which relates to motor vehicle safety exists in certain Model Year 2019-2023 FCCC S2G and TBB Saf-T-Liner C2 vehicles manufactured February 5, 2019, through March 1, 2022, equipped with PSI 8.8L LPG fueled engine.

On certain S2G and Saf-T-Liner C2 vehicles, while in motion, the engine control module (ECM) may set a code 629/12 causing the engine to randomly shut off without warning. An unintended shut down without warning and without the ability to restart the engine may result in an increased risk of a crash or could result in the transfer of passengers to alternate transportation in an uncontrolled traffic environment, increasing the risk of injury.

Vehicles will receive an ECM software update to eliminate the potential intermittent stalling. Repairs will be performed by Daimler Truck North America authorized service facilities.
