LPG Engine Stall**

This notice is sent to you in accordance with the requirements of the *National Traffic and Motor Vehicle Safety Act*.

Daimler Truck North America LLC (DTNA), on behalf of its wholly owned subsidiaries, Freightliner Custom Chassis Corporation and Thomas Built Buses, has decided that a defect which relates to motor vehicle safety exists in certain Model Year 2019-2023 FCCC S2G and TBB C2 Saf-T-Liner vehicles manufactured February 5, 2019, through March 1, 2022, equipped with PSI 8.8L LPG fueled engine.

On certain TBB C2 Saf-T-Liners and FCCC S2G vehicles, while in motion, the engine control module (ECM) may set a code code 629/12 causing the engine to randomly shut off without warning. An unintended shut down without warning and without the ability to restart the engine may result in an increased risk of a crash or could result in the transfer of passengers to alternate transportation in an uncontrolled traffic environment, increasing the risk of injury.

This is the first of two notices you will receive regarding this subject. This letter is to inform you of an upcoming Recall to correct the issue noted above. Daimler Trucks is currently working on a solution. **There is no action for you to take at this time.**

The second notice will inform you when the free, final remedy is available. **When you receive the second notice**, please contact your authorized Daimler Trucks North America dealer to schedule the Recall for your vehicle.
