IMPORTANT LINCOLN CORSAIR® SUV SAFETY RECALL NOTIFICATION DELETE

Aug 20, 2022 at 4:36PM

Keeping you, and everyone who rides with you, safe is a top priority. It's the reason I'm reaching out to you today.

You likely read the safety recall notice that appeared in your Lincoln Way® App. When problems occur with your vehicle, it's disappointing for me personally and something our entire team wants to make right as quickly as possible. You deserve our best.

Your Lincoln Way App will alert you to recall details today and keep you updated in real-time going forward. We're also in close contact with our Lincoln Retailers, who are all committed and ready to take care of you.

In fact, this repair can be made at your local Lincoln Retailer immediately. So, please contact them today to make an appointment for a service time most convenient for you — at no charge. If it helps, we can pick up, service and then return your vehicle with Lincoln Pickup & Delivery. This service is also available at no charge. Your local Lincoln Retailer is also ready to help you secure a one-day loaner vehicle if you need one.

I realize this is both unexpected and inconvenient for you. Please accept my personal apology on behalf of all of us at Lincoln. Feel free to keep in touch with us through the following resources:

- You now have a dedicated service team member assigned to personally assist you every step of the way. If you have questions or there's anything we can do, just reach out at 833-807-3673.
- The Lincoln Way App is a great resource for not only safety recall information but also other vehicle health information and online service scheduling.
- Frequently Asked Questions and recall information are available anytime, 24 hours a day, at Lincoln.com/corsairrecall.

We care deeply about making luxury vehicles you can count on every day. This is not the experience we want for you, and we are committed to making it right. Thank you for being part of the Lincoln community.

Sincerely,
Joy Falotico
President, Lincoln

 **LINCOLN NOTIFICATION**

Important Lincoln Corsair® SUV Safety Recall Notification

Keeping you, and everyone who rides with you, safe is a top priority. It's the reason I'm reaching out to you today.

You recently received a Safety Recall Notification that shared details on recall information for your Corsair. You deserve our best. When problems occur with your vehicle, it's disappointing for me personally and something our entire team wants to make right as quickly as possible.

As soon as we have information, we want you to know it. So, please check your Lincoln Way® App. It will alert you to recall details today and keep you updated in real-time going forward. We're also in close contact with our Lincoln Retailers, who are all committed and ready to take care of you.

In fact, this repair can be made at your local Lincoln Retailer immediately. So, please contact them today to make an appointment for a service time most convenient for you — at no charge. If it helps, we can pick up, service and then return your vehicle with Lincoln Pickup & Delivery. This service is also available at no charge.

Your local Lincoln Retailer is also ready to help you secure a one-day loaner vehicle if you need one. They'll do their best to provide you something comparable to drive.

I realize this is both unexpected and inconvenient for you. Please accept my personal apology on behalf of all of us at Lincoln.

I invite you to keep in touch with us throughout this experience, and anytime otherwise, through resources we've created for you:

- You now have a dedicated service team member assigned to personally assist you every step of the way. If you have questions or there's anything we can do, just reach out to speak to your representative at 833-807-3673.
- Please feel free to download the Lincoln Way App, if you haven't already. It's a great resource for not only safety recall information but also other vehicle health information and online service scheduling.
- Frequently Asked Questions and recall information are available anytime, 24 hours a day, at Lincoln.com/corsairrecall.

We care deeply about making luxury vehicles you can count on every day. This is not the experience we want for you, and we are committed to making it right. Thank you for being part of the Lincoln community.

Sincerely,
Joy Falotico
President, Lincoln

2020-2022 Lincoln Corsair[®] SUV Safety Recall

Keeping you, and everyone who rides with you, safe is our top priority. The recall repair for affected 2020, 2021 and 2022 Lincoln Corsair[®] SUV models can be made immediately. Please call your [Lincoln Retailer](#) to make an appointment, or you can also book service online or in the Lincoln Way[®] App. The app will alert you to recall details today and keep you updated in real time going forward.

Your Lincoln Retailer is also ready to help you secure a one-day loaner vehicle if you need one, or, if it's more convenient for you, we can pick up, service and return your vehicle with Lincoln Pickup & Delivery. This is available at no charge.

You deserve our best, and there's nothing more important to us than making this right. We've reached out to affected owners and lessees directly, and you can also check to see if your vehicle is included in this recall by entering your VIN [here](#).

We care deeply about making vehicles you can count on every day. If you have any further questions or concerns, please call 833-807-3673, and we'll assign a dedicated service team member to personally assist you every step of the way.

We're committed to delivering vehicles you can continue to count on. Thank you for being a member of the Lincoln community.

Frequently Asked Questions

WHAT IS THE ISSUE TIED TO THIS RECALL?

In some of our Escape[®] SUVs, Maverick[®] pickups and Lincoln Corsair[®] SUVs, there's the risk of an underhood fire, melting engine components or smoke, increasing the risk of an injury. In the event of an engine failure, engine oil and/or fuel vapor may leak and accumulate under the hood of your vehicle.

WHAT CAUSED THIS ISSUE?

Unfortunately, we've had some isolated engine manufacturing issues that cause engine block or oil pan breaches that result in 2.5L HEV/PHEV engine failures. The fluid dynamics created by the Under Engine Shield and Active Grille Shutter System could increase the likelihood of engine oil and/or fuel vapor accumulating near other sources of ignition, such as the exhaust system.

WHO IS THE SUPPLIER INVOLVED IN THIS 2020-2022 FORD ESCAPE®, 2022 FORD MAVERICK® AND 2020-2022 LINCOLN CORSAIR® ENGINE FIRE RECALL?

None of our suppliers are involved. We accept responsibility and are ready to help every owner affected get the needed repairs quickly.

WHAT IS THE EXPECTED REPAIR?

Local dealers are ready to repair affected vehicles now. The repair will modify the Under Engine Shield and Active Grille Shutter and get anyone affected back on the road again safely.

WHAT MODIFICATIONS WILL YOU MAKE TO THE UNDER ENGINE SHIELD AND ACTIVE GRILLE SHUTTER?

We'll add more drain holes to the Under Engine Shield. We'll also make sure that the Active Grille Shutter moves airflow through the engine compartment and reduces underhood temperatures during forward motion and/or while the cooling fan operates.

DOES THE MODIFICATION OF THE ACTIVE GRILLE SHUTTER MEAN FUEL ECONOMY NUMBERS WILL CHANGE?

No, fuel economy won't be affected.

DIDN'T YOU JUST RECALL EXPEDITION® AND NAVIGATOR® SUVs FOR UNDERHOOD FIRE ISSUES? WHAT IS GOING ON AT FORD?

Keeping you happy means the world to us. So does keeping you safe. We continually monitor our products after they come off the line. When an issue comes up, we will always take any action required to ensure your safety and improve our quality. We sincerely regret any inconvenience a product recall causes our owners. We remain committed to launching products with top quality and immediately addressing issues when they appear.

AS PART OF THE EXPEDITION AND NAVIGATOR RECALL, YOU ASKED CUSTOMERS TO PARK OUTSIDE AND AWAY FROM STRUCTURES. ARE YOU ASKING CUSTOMERS TO DO THAT IN THIS RECALL?

No. We asked customers with certain 2021 Expedition and Navigator SUVs to park outside and away from structures due to the risk of a fire after the vehicle has been parked and is turned off. The incidents we're seeing for this recall indicate that underhood fires occur only when the vehicle is being driven. So there's no need to park away from any structure.

ARE THERE ANY OPEN INVESTIGATIONS ON THIS SPECIFIC ISSUE?

No.

HOW MANY VEHICLES ARE AFFECTED IN THIS RECALL, AND WHERE ARE THEY?

This recall affects 100,689 vehicles in the U.S.

HOW MANY RECALLED VEHICLES MAY EXPERIENCE THIS ISSUE?

Safety is our priority, and we want to prevent any potential injuries. We're doing our best to make sure very few owners experience any trouble on the road.

WHERE WERE THE AFFECTED VEHICLES BUILT?

The affected Ford Escape vehicles were built at the Louisville Assembly Plant between January 19, 2019, and June 13, 2022. Lincoln Corsair vehicles being recalled were built at the Louisville Assembly Plant between October 24, 2019, and June 13, 2022. Ford Maverick vehicles that are affected were built at the Hermosillo Assembly Plant between February 3, 2021, and June 8, 2022.

IS THERE ANYTHING THAT COULD INDICATE A VEHICLE MIGHT HAVE AN ISSUE?

Engine failure is expected to produce loud noises, for instance, a metal-to-metal clank. If you hear a noise like this, safely park and shut off the engine as quickly as possible. Please do the same if you experience an unexpected loss of engine power or see smoke coming from the engine compartment.

WHEN WILL RETAILERS BE NOTIFIED ABOUT THE SAFETY RECALL AND THE RECOMMENDED FIX?

Our retailers are aware of this recall, and they're committed to helping any affected customers get repairs completed quickly.

WILL THERE BE A CHARGE TO CUSTOMERS?

No one will be charged for this service.

WHAT IS THE REFERENCE NUMBER FOR THIS FORD AND LINCOLN RECALL?

Our recall number to reference for this is 22S47.

Frequently Asked Questions

What is the issue tied to this recall?

In some of our Escape[®] SUVs, Maverick[®] pickups and Lincoln Corsair[®] SUVs, there's the risk of an underhood fire, melting engine components or smoke, increasing the risk of an injury. In the event of an engine failure, engine oil and/or fuel vapor may leak and accumulate under the hood of your vehicle.

What caused this issue?

Unfortunately, we've had some isolated engine manufacturing issues that cause engine block or oil pan breaches that result in 2.5L HEV/PHEV engine failures. The fluid dynamics created by the Under Engine Shield and Active Grille Shutter System could increase the likelihood of engine oil and/or fuel vapor accumulating near other sources of ignition, such as the exhaust system.

Who is the supplier involved in this 2020-2022 Ford Escape®, 2022 Ford Maverick® and 2020-2022 Lincoln Corsair® engine fire recall?

None of our suppliers are involved. We accept responsibility and are ready to help every owner affected get the needed repairs quickly.

What is the expected repair?

Local dealers are ready to repair affected vehicles now. The repair will modify the Under Engine Shield and Active Grille Shutter and get anyone affected back on the road again safely.

What modifications will you make to the Under Engine Shield and Active Grille Shutter?

We'll add more drain holes to the Under Engine Shield. We'll also make sure that the Active Grille Shutter moves airflow through the engine compartment and reduces underhood temperatures during forward motion and/or while the cooling fan operates.

Does the modification of the Active Grille Shutter mean fuel economy numbers will change?

No, fuel economy won't be affected.

Didn't you just recall Expedition® and Navigator® SUVs for underhood fire issues? What is going on at Ford?

Keeping you happy means the world to us. So does keeping you safe. We continually monitor our products after they come off the line. When an issue comes up, we will always take any action required to ensure your safety and improve our quality. We sincerely regret any inconvenience a product recall causes our owners. We remain committed to launching products with top quality and immediately addressing issues when they appear.

As part of the Expedition and Navigator recall, you asked customers to park outside and away from structures. Are you asking customers to do that in this recall?

No. We asked customers with certain 2021 Expedition and Navigator SUVs to park outside and away from structures due to the risk of a fire after the vehicle has been parked and is turned off. The incidents we're seeing for this recall indicate that underhood fires occur only when the vehicle is being driven. So there's no need to park away from any structure.

Are there any open investigations on this specific issue?

No.

How many vehicles are affected in this recall, and where are they?

This recall affects 100,689 vehicles in the U.S.

How many recalled vehicles may experience this issue?

Safety is our priority, and we want to prevent any potential injuries. We're doing our best to make sure very few owners experience any trouble on the road.

Where were the affected vehicles built?

The affected Ford Escape vehicles were built at the Louisville Assembly Plant between January 19, 2019, and June 13, 2022. Lincoln Corsair vehicles being recalled were built at the Louisville Assembly Plant between October 24, 2019, and June 13, 2022. Ford Maverick vehicles that are affected were built at the Hermosillo Assembly Plant between February 3, 2021, and June 8, 2022.

Is there anything that could indicate a vehicle might have an issue?

Engine failure is expected to produce loud noises, for instance, a metal-to-metal clank. If you hear a noise like this, safely park and shut off the engine as quickly as possible. Please do the same if you experience an unexpected loss of engine power or see smoke coming from the engine compartment.

When will dealers be notified about the safety recall and the recommended fix?

Our dealers are aware of this recall, and they're committed to helping any affected customers get repairs

completed quickly.

Will there be a charge to customers?

No one will be charged for this service.

What is the reference number for this Ford and Lincoln recall?

Our recall number to reference for this is 22S47.

How much is this recall costing Ford?

We do not disclose this information.

Frequently Asked Questions

What is the issue tied to this recall?

In some of our Escape[®] SUVs, Maverick[®] pickups and Lincoln Corsair[®] SUVs, there's the risk of an underhood fire, melting engine components or smoke, increasing the risk of an injury. In the event of an engine failure, engine oil and/or fuel vapor may leak and accumulate under the hood of your vehicle.

What caused this issue?

Unfortunately, we've had some isolated engine manufacturing issues that cause engine block or oil pan breaches that result in 2.5L HEV/PHEV engine failures. The fluid dynamics created by the Under Engine Shield and Active Grille Shutter System could increase the likelihood of engine oil and/or fuel vapor accumulating near other sources of ignition, such as the exhaust system.

Who is the supplier involved in this 2020-2022 Ford Escape®, 2022 Ford Maverick® and 2020-2022 Lincoln Corsair® engine fire recall?

None of our suppliers are involved. We accept responsibility and are ready to help every owner affected get the needed repairs quickly.

What is the expected repair?

Local dealers are ready to repair affected vehicles now. The repair will modify the Under Engine Shield and Active Grille Shutter and get anyone affected back on the road again safely.

What modifications will you make to the Under Engine Shield and Active Grille Shutter?

We'll add more drain holes to the Under Engine Shield. We'll also make sure that the Active Grille Shutter moves airflow through the engine compartment and reduces underhood temperatures during forward motion and/or while the cooling fan operates.

Does the modification of the Active Grille Shutter mean fuel economy numbers will change?

No, fuel economy won't be affected.

Didn't you just recall Expedition® and Navigator® SUVs for underhood fire issues? What is going on at Ford?

Keeping you happy means the world to us. So does keeping you safe. We continually monitor our products after they come off the line. When an issue comes up, we will always take any action required to ensure your safety and improve our quality. We sincerely regret any inconvenience a product recall causes our owners. We remain committed to launching products with top quality and immediately addressing issues when they appear.

As part of the Expedition and Navigator recall, you asked customers to park outside and away from structures. Are you asking customers to do that in this recall?

No. We asked customers with certain 2021 Expedition and Navigator SUVs to park outside and away from structures due to the risk of a fire after the vehicle has been parked and is turned off. The incidents we're seeing for this recall indicate that underhood fires occur only when the vehicle is being driven. So there's no need to park away from any structure.

Are there any open investigations on this specific issue?

No.

How many vehicles are affected in this recall, and where are they?

This recall affects 100,689 vehicles in the U.S.

How many recalled vehicles may experience this issue?

Safety is our priority, and we want to prevent any potential injuries. We're doing our best to make sure very few owners experience any trouble on the road.

Where were the affected vehicles built?

The affected Ford Escape vehicles were built at the Louisville Assembly Plant between January 19, 2019, and June 13, 2022. Lincoln Corsair vehicles being recalled were built at the Louisville Assembly Plant between October 24, 2019, and June 13, 2022. Ford Maverick vehicles that are affected were built at the Hermosillo Assembly Plant between February 3, 2021, and June 8, 2022.

Is there anything that could indicate a vehicle might have an issue?

Engine failure is expected to produce loud noises, for instance, a metal-to-metal clank. If you hear a noise like this, safely park and shut off the engine as quickly as possible. Please do the same if you experience an unexpected loss of engine power or see smoke coming from the engine compartment.

When will dealers be notified about the safety recall and the recommended fix?

Our dealers are aware of this recall, and they're committed to helping any affected customers get repairs

completed quickly.

Will there be a charge to customers?

No one will be charged for this service.

What is the reference number for this Ford and Lincoln recall?

Our recall number to reference for this is 22S47.

How much is this recall costing Ford?

We do not disclose this information.
