Dear Mercedes-Benz Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Mercedes-Benz AG ("MBAG"), the manufacturer of Mercedes-Benz vehicles, has decided that a defect which relates to motor vehicle safety exists in certain Model Year ("MY") 2020 GLC-Class vehicles. Our records indicate that your vehicle is included in the affected population of vehicles.

What is the issue?

The routing of the transmission wiring harness might not have been routed properly. The mis-positioning of the transmission wiring harness could cause it to chafe against the front drive shaft. This chafing could result in loss of drive power, which could increase the risk of a crash. If the failure occurs, the driver would be made aware through a warning message in the instrument cluster.

What will your Mercedes-Benz Dealership do?

An authorized Mercedes-Benz dealer will inspect the transmission wiring harness and replace it, if necessary. **This service will be provided free of charge.** We are dedicated to always delivering the best customer experience, and respect for your time is a top priority. While the minimum repair time can be less than 2 hours, your dealer can provide you with a better estimate of the overall time for this service visit. As a matter of normal service process, an authorized Mercedes-Benz dealer will also check for other repair measures which might be applicable to your vehicle and this may increase the required working time.

Steps to take.
