

New Safety Recall Advanced Communication – Z68

FCA US LLC (FCA US) has announced a safety recall on certain 2022 Model Year (LA) Dodge Challenger, (LD) Dodge Charger and (LX) Chrysler 300 vehicles.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been built with a Tire Pressure Monitor System (TPMS) sensor that prematurely discharge its battery, making the TPMS sensor inoperative. If the TPMS light illuminates because the battery in the sensor prematurely discharges, it could mask an actual low tire pressure condition, possibly resulting in tire failure, which can cause a vehicle crash without prior warning.

The condition described above does not comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 571.138 states that "...each vehicle must be equipped with a tire pressure monitor system" that detects "when one or more of a vehicles tire is significantly under-inflated and illuminates a low tire pressure warning telltale." The tire pressure system in the suspect vehicles may not detect low tire pressure.

SERVICE ACTION

FCA US will conduct a voluntary safety recall to inspect and replace the suspect TPMS sensors as needed. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 3rd Quarter of 2022.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
