Dear Audi Owner,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Our records show that you are the owner of a vehicle affected by this action.

**What is the issue?** A component of the fuel delivery module inside the fuel tank may break while operating the vehicle. The fragments can damage the sealing membrane in the pressure regulator. This may lead to a failure of the fuel delivery module and the instrument cluster will display the Malfunction Indicator Light (MIL). In rare cases and under certain circumstances, however, there may be a sudden loss of engine power or the vehicle may break down without a warning appearing beforehand. A fuel leak due to this failure can be ruled out.

**What will we do?** To correct this defect, your authorized Audi dealer will replace the fuel delivery module. This work will take up to a day to complete and will be performed for you free of charge. Please keep in mind that your dealer may need additional time for the preparation of the repair, as well as to accommodate their daily workshop schedule.

**What should you do?** Please contact your authorized Audi dealer without delay to schedule this recall work. For your convenience, you can also visit [www.audiusa.com](http://www.audiusa.com) and click on the “Find a Dealer” link to locate a dealer near you and schedule this service.

**Lease vehicles and address changes** If you are the lessor and registered owner of the vehicle identified in this action, the law requires you to forward this letter immediately via first-class mail to the lessee within ten (10) days of receipt.
