Vehicle 3 : 2016-2016 Ferrari F60 America

Vehicle Type : LIGHT VEHICLES

Body Style :

Power Train : GAS

Descriptive Information : Ferrari has determined that a defect related to motor vehicle safety may arise in some MY 2016 Ferrari F60 America vehicles. These vehicles are equipped with a braking system that could potentially leak brake fluid, which may lead to partial or total loss of braking capability. Affected vehicles: MY 2016 Ferrari F60 America.

Production Dates : JUN 19, 2015 - SEP 23, 2016

VIN Range 1 : Begin : ZFF85BHA0G0215094 End : ZFF85BHA8G0223542 ☒ Not sequential

Vehicle 4 : 2005-2011 Ferrari 612 Scaglietti

Vehicle Type : LIGHT VEHICLES

Body Style : 2-DOOR

Power Train : GAS

Descriptive Information : Ferrari has determined that a defect related to motor vehicle safety may arise in some MY 2005 - 2011 Ferrari 612 Scaglietti vehicles. These vehicles are equipped with a braking system that could potentially leak brake fluid, which may lead to partial or total loss of braking capability. Affected vehicles: MY 2005- 2011 Ferrari 612 Scaglietti.

Production Dates : MAR 30, 2004 - FEB 28, 2011

VIN Range 1 : Begin : ZFFAA54A050136719 End : ZFF54JBAXB0179531 ☒ Not sequential

Vehicle 5 : 2018-2022 Ferrari 812

Vehicle Type : LIGHT VEHICLES

Body Style : 2-DOOR

Power Train : GAS

Descriptive Information : Ferrari has determined that a defect related to motor vehicle safety may arise in some MY 2018 - 2022 Ferrari 812 vehicles. These vehicles are equipped with a braking system that could potentially leak brake fluid, which may lead to partial or total loss of braking capability. Affected vehicles: MY 2018 – 2021 Ferrari 812 Superfast; MY 2020 – 2021 Ferrari 812 GTS; and MY 2022 Ferrari 812 Competizione.

Production Dates : SEP 27, 2017 - JUL 22, 2022

Description of Defect :

Description of the Defect : Ferrari has determined that a defect related to motor vehicle safety may arise in certain of the vehicles identified in the “Vehicle Information” section. These vehicles are equipped with a brake reservoir fluid cap that may not vent properly, thereby creating a vacuum inside the brake fluid reservoir, which may potentially leak brake fluid and lead to a partial or total loss of braking capability.

FMVSS 1 : NR

FMVSS 2 : NR

Description of the Safety Risk : Upon total loss of brake fluid, the vehicle would lose braking capability, which may result in injury or death to vehicle occupants.

Description of the Cause : Ferrari’s investigation revealed that the brake fluid reservoir cap fitted on the affected vehicles did not provide the proper ventilation for the braking system.

Identification of Any Warning that can Occur : When the quantity of brake fluid in the brake fluid reservoir decreases by approximately 50% of the maximum reservoir level, a warning light will appear on the vehicle’s dashboard. On later models, additionally, a message will also appear on the vehicle’s dashboard that reads as follows: “Brake fluid level low, Go to dealer slowly”. Additionally, on certain models, an acoustic buzzer will sound, if available.

Chronology :

See attached chronology.

Description of Remedy :

Description of Remedy Program : The repair consists of replacing the brake fluid reservoir cap and updating the software in the affected vehicles to provide for a different warning message if the vehicle should lose sufficient brake fluid. Ferrari will send a notice letter to all affected vehicle owners to warn them of this issue, and instruct them 1) to contact an authorized Ferrari dealer to schedule the free recall repair, and 2) that in the meantime, remind them that if the "low Brake Fluid" warning message appears on the vehicle dashboard, the driver should pull off the road as soon as it is safe to do so, and then contact Ferrari Roadside Assistance and get towed to the nearest authorized Ferrari dealer.

How Remedy Component Differs from Recalled Component : The venting of the brake fluid reservoir cap has been modified.

Identify How/When Recall Condition was Corrected in Production : All vehicles currently in production will be fitted with a different brake fluid reservoir cap and new upgraded software.

Recall Schedule :

Description of Recall Schedule : As discussed with NHTSA, Ferrari intends to send client notification letters to current owners of affected vehicles on a model by model basis (i.e., rolling basis) as sufficient parts are made available to cover the population of the subject model. Letters to affected owners of the Ferrari Roma and 612 Scaglietti will be sent on or before November 30, 2022 advising them to contact an authorized Ferrari dealer to schedule an appointment to have the recall work performed.
