SAFETY – RECALL – 22004 (22V-625)

Dear Final Stage Manufacturer,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Spartan Fire, LLC has decided that a defect which relates to motor vehicle safety exists in certain 2022 model year MetroStar model Emergency Response chassis cabs.

What is the defect?

On the affected vehicle, the ECMs that are affected by the defect condition may develop an internal electrical short circuit, possibly resulting in an engine stall without warning. If this occurs, the engine cannot be restarted until replacement of the ECM and, if necessary, the fuse.

An unexpected engine stall without the ability to restart the engine may lead to an increased risk of a crash.

Corrective Action:

Vehicles subject to this recall are to be inspected and repaired by a Cummins certified dealer or technician. Replacement of the ECM will take approximately 4 – 5 hours. There is no cost to the vehicle owner for the recall remedy.

What should the final stage manufacturer do?

On the attached document, you will find the chassis cab Spartan has sold to you. If you agree the identified chassis contains a safety defect, you are reminded of your responsibility to notify the National Highway Traffic Safety Administration (NHTSA) in accordance with 49CFR573. **It is a violation of federal regulation to sell a vehicle subject to a safety recall without the recall first being remedied.**
