Description of Remedy :

Description of Remedy Program : REV Recreation Group will notify dealers/customers of this campaign. Hydraulic hoses that are at risk of damage due to chaffing or heat will be inspected and if defective, will be protected or replaced. REV RV will notify dealers by providing inspection and repair instructions for motor homes. The repairs will be made free of charge. Owners that have had previously paid to have their RV remedied will be reimbursed upon presentation of a receipt.

How Remedy Component Differs from Recalled Component : Engineering has reviewed the processes and updated the leveling hose routing schematics. Quality and Operations have implemented training and standard work to ensure proper routing and protection. Changes to standard work includes installing protective loom and heat reflective material to hoses that are near areas where chassis or frame abrasions could occur or near heat sources.

Identify How/When Recall Condition was Corrected in Production : Under the direction of engineering on August 15, 2022, all units in REV's Plant inventory were inspected and if needed, leveling hoses were rerouted and protection added prior to shipment to commerce.
