Description of Noncompliance :

Description of the Noncompliance : The subject vehicles do not meet the requirements of S10.18.9.2 of FMVSS No. 108 because the horizontal adjustment mechanism is not covered by a sealing cap.

FMVSS 1 : 108 - Lamps, reflective devices, and assoc. Equipment

FMVSS 2 : NR

Description of the Safety Risk : Porsche does not expect the horizontal adjustment will be misused by the customers. However, it is possible that someone could inadvertently adjust the lower beam horizontal adjustment mechanism to an improper setting. Improper horizontal aim can create glare to other motorists or reduce operator's visibility. This could increase the risk of a crash.

Description of the Cause : Incorrect assembly instructions. More specifically, the subject vehicles are designed to meet S10.18.9.2 of FMVSS No. 108 by sealing off the headlamp horizontal adjustment screw with a sealing cap after initial adjustment at the manufacturing plant. However, due to incorrect assembly instructions, the sealing cap was not installed on subject vehicles at the plant.

Identification of Any Warning that can Occur : None

Involved Components :

Component Name 1 : Headlight sealing cap

Component Description : Sealing cap

Component Part Number : 99763112700

Component Name 2 : Headlight sealing cap

Component Description : Sealing cap

Component Part Number : 9A794104100

Component Name 3 : Headlight sealing cap

Component Description : Sealing cap

Component Part Number : 97063119700

Supplier Identification :

Component Manufacturer

Name : HELLA GmbH & Co. KGaA

Address : Rixbecker Straße 45
Lippstadt Foreign States 59552

Country : Germany

Chronology :

In May of 2022, Porsche's production plant in Leipzig discovered missing sealing caps in vehicles for the Canadian market. Porsche immediately began investigating the scope of the affected vehicles, including past production records.

Porsche in parallel studied whether the missing sealing cap was necessary to prevent the potential for adjustment, and how the agency addressed questions concerning the sealing caps in past petitions. This work continued through August 2022.

On August 24, 2022, Porsche decided that the subject issue was a noncompliance with S10.18.9.2 of FMVSS No. 108.

Description of Remedy :

Description of Remedy Program : Check the installation of the caps on the left and right headlights. If no caps are fitted, they are retrofitted. The owner's letter will advise that Porsche offers a reimbursement for pre-notification remedies in accordance with 49 CFR §573.13.

How Remedy Component Differs from Recalled Component : The installation of the sealing cap will preclude future adjustment of the headlight in the horizontal direction.

Identify How/When Recall Condition was Corrected in Production : A process optimization was introduced into the vehicle production that ensures the installation of the caps after the headlights have been initially adjusted.

Recall Schedule :

Description of Recall Schedule : The remedy will be available in conjunction with next scheduled service.
Owners will be notified within 60 days of this notice.
Planned Dealer Notification Date : SEP 14, 2022 - SEP 14, 2022
