Dear «Dealer_name»,

Keystone RV Company has decided that a defect which relates to motor vehicle safety exists in certain model 2023 Aspen Trail, Coleman, Kodiak Travel Trailers. As a result, Keystone RV is conducting a safety recall.

Reason for this recall

It has been decided that the vehicles in the recall population have an electric stabilizer jack switch that is not waterproof from the back side of the switch. Under certain conditions during travel, the back side of the extend/retract switch for the electric stabilizer jacks can short out causing the jacks to extend during travel, leading to an increased risk of personal injury, and or vehicle crash. The vehicles included in the recall are:

Year	Model	Serial Number Ranges
2023	Aspen Trail – All models	P8920010 - P8920130
2023	Coleman – All models except 18FQ, 202RD	PH930581 - PH930814 PM930843 - PM931021
2023	Kodiak – All Except 199RK, 201QB, 22SBH	PJ970001 - PJ970133

Our records indicate unit(s) sold or in your present lot inventory fall within this range, which will require immediate preventative action. **Important:** If some of the units are still in your inventory, Federal Law requires you to complete the recall service on those units before retail delivery. The unit VIN(s) our records indicate are presently in your inventory or have been sold are as follows:

«VIN1» «VIN2» «VIN3» «VIN4»
«VIN5» «VIN6» «VIN7» «VIN8»
«VIN9»

-- Serial numbers with '*' have been retail sold --

Claims for the units which have been serviced must be submitted. Claims submitted will be used by Keystone to record recall service completions and provide dealer payments. Enclosed is a copy of the Safety Advisory #22-435, which details how to remedy the situation and the proper reimbursement procedures.

We apologize for any inconvenience this situation may cause and greatly appreciate your cooperation. Should you have any questions or concerns regarding this correspondence or the enclosed Safety Advisory, please feel free to contact us.

Sincerely,

KEYSTONE RV COMPANY
