Subject: Notification of Safety Recall and Recall Remedy Instructions for 22V-669
Certain Gradall/Vacall AllJetVac sewer cleaning vehicles manufactured in 2019 – 2022
Hose Reel Tilt Cylinder Rod and Clevis

REASON FOR THIS SAFETY RECALL:

On September 6, 2022, Alamo Group Inc., filed a Defect Information Report with the National Highway Traffic Safety Administration (NHTSA) informing the agency that in AllJetVac vehicles manufactured by Gradall, the clevis which attached the hose reel tilt cylinder rod to the hose reel is not the proper length to allow for full engagement. If the hose reel cylinder rod is not properly engaged with the clevis, the hose reel could tilt forward while the vehicle is stationary, increasing the risk of injury to individuals.

This service must be performed on all affected vehicles at no charge to the vehicle owner. Attached please find the service procedure for completing this repair. The repair takes about 1 hour to complete.
