Subject: Completion of Recall Campaign # 22V692

The recall campaign in subject was started on September 15, 2022, following a fire incident in the motor compartment of an electric vehicle. The origin of the incident was linked to the charging port.

As of November 13, 2022, we can report that all recalled vehicles have either been repaired, or are under our control and are currently being repaired.

Accordingly, we believe that it is not necessary to send notification to dealers and owners.

Yours sincerely,

A handwritten signature in blue ink, appearing to read "Marie-Claude Gagnon".
