USA	2023	2023	ATLAS CROSS SPORT													
			What is the safety concern for Safety Recall 47T2?	A brake line may leak at the threaded connections. Brake fluid leaks can lead to an increase in stopping distance, which may increase the risk of a crash. If a leak is present, the low brake fluid warning light will illuminate in the instrument panel. After the reservoir of the potentially affected brake circuit is completely depleted, the brake pedal travel may begin to increase or the pedal may begin to feel soft.												
			Are there any precautions I should take because my vehicle is part of Safety Recall 47T2?	Affected vehicles can continue to be driven as usual, but if the brake fluid warning light illuminates, or if the brake pedal travel increases or feels soft, customers are advised to contact the nearest authorized Volkswagen dealer or qualified workshop without delay in order to have the vehicle inspected/repared.												
			What is the repair for the Safety Recall 47T2?	To address this potential issue, your authorized Volkswagen dealer will replace the affected brake lines.												
			When will the repair for Safety Recall 47T2 be available?	Repairs for this recall have begun. Please contact your authorized Volkswagen dealer without delay to schedule this recall repair. To set up an appointment online, please visit www.vw.com/find-a-dealer .
