Dear «Owner\_name»:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Keystone RV Company has decided that a defect which relates to motor vehicle safety exists in certain model 2021-2022 Redwood, Voltage, Yukon Fifth Wheels. As a result, Keystone RV is conducting a safety recall. We apologize for any inconvenience this action may cause you; however your safety and continued satisfaction are of the utmost importance to us.

***Reason for  
this recall***

It has been decided that vehicles in the recall population have a Dexter axle using a spring pack with U-bolts that may not be properly torqued. Under certain conditions during travel, if the improperly torqued U-bolts come loose, there is an increased risk of the axle sliding back on the springs, which could result in poor vehicle handling and/or vehicle crash.

***What we  
will do***

Keystone representatives have been in contact with the staff at your selling dealership regarding this situation. The remedy is to torque the axle spring U-bolts to 110 ft lbs. The service and parts required for this corrective action will be provided at no charge to you.

***What we  
need you to  
do***

Springs can be visually inspected to see if they are misaligned or if the U-bolts are loose. The U-bolt fasteners can be properly torqued to 110 ft lbs.
