Details of the Recall

The front seat belt retractor on your vehicle may have an incorrectly welded Micro Gas Generator (MGG). An incorrectly welded MGG may lead to a pretensioner system failure. Pretensioner system failure may result in reduced occupant restraint during a vehicle crash, potentially increasing the risk of injury.

FCA US will repair your vehicle free of charge (parts and labor). To do this, your dealer will replace the seat belt retractor. The estimated repair time is one hour. In addition, your dealer will require your vehicle for proper check-in, preparation, and check-out during your visit, which may require more time. Your time is important to us, so we recommend that you schedule a service appointment to minimize your inconvenience.

How do I schedule my **FREE** repair?

- ◆ Simply contact your Chrysler, Jeep®, Dodge or RAM dealer right away to schedule a service appointment.

We apologize for any inconvenience, but are sincerely concerned about your safety. Thank you for your attention to this important matter.
