## **Safety Recall 22V786 - Electrical Short Circuit May Cause Engine Stall**

This notice applies to your vehicle with VIN {XXXXXXXXXXXXX} - Chassis Serial Number { UE } XXXX

### **Important Safety Recall**

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Kalmar has decided that a defect, which relates to motor vehicle safety, exists in certain Ottawa T2 model terminal tractors manufactured between July 28, 2022 and August 31, 2022. As a result of this decision Kalmar has initiated a recall of the affected vehicles.

Our investigation, in conjunction with Cummins Inc., has determined that certain 2022 Kalmar Ottawa T2 vehicles have Engine Control Modules (ECM) installed that may develop an internal electrical short, possibly resulting in an engine stall without warning, which may lead to an increased risk of a crash.

In order to remedy the situation, customers will be contacted by Cummins to schedule a replacement of the ECM. The remedy will be performed at no cost to the customer and Cummins will reimburse dealers for their work.
