

NHTSA Safety Recall 22V-795

TO: Winnebago Dealers

SUBJECT: Campaign # 170 – LP Hose / Tire

The National Traffic and Motor Vehicle Safety Act, as amended, provides that each vehicle which is subject to a recall campaign of this type must be adequately repaired within a reasonable time after the owner has tendered it for repair. A failure to adequately repair within 60 days after tender of a vehicle is prima facie evidence of failure to repair within a reasonable time.

If the condition is not adequately repaired within a reasonable time, the owners may be entitled to an identical or reasonably equivalent vehicle at no charge or to a refund of the purchase price less a reasonable allowance for depreciation.

To avoid having to provide these burdensome solutions, every effort must be made to promptly schedule an appointment with each owner and to repair their vehicle as soon as possible. As you will see in reading the enclosed copy of the letter, which is being sent to owners, the owners are being instructed to contact Winnebago, if you do not remedy the condition within five days of the mutually agreed upon service date. If the condition is not remedied within a reasonable time, they are instructed on how to contact the National Highway Traffic Safety Administration.

REASON FOR THIS RECALL

Winnebago has decided that a defect related to motor vehicle safety exists on certain 2020-2023 View and Navion motorhomes. These motor homes were manufactured March 1, 2019 through October 13, 2022.

In some instances, it is possible the tire can contact the LP line routed near the rear driver side wheel well and wear a hole in the LP line causing a leak. The LP line may not have been secured properly, which in some cases allowed for more slack in the LP line enabled the LP line to contact the rear tire. A LP leak in the presence of an ignition source could result in a fire.
