### LPG Regulator Hose Leak

Dear Tiffin Motorhome Dealer,

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Tiffin Motorhomes has decided that a defect, which relates to motor vehicle safety, exists on the following models of motorhomes: **2023 Allegro (Open Road), 2023 Allegro RED 340, 2022 and 2023 Allegro RED 360, 2022 and 2023 Allegro Breeze, 2022 and 2023 Allegro Bay, and 2022 and 2023 Phaeton Motorhomes, all equipped with the option for LP gas and that were built between May 5, 2022, and October 21, 2022.**

Tiffin Motorhomes has become aware of the possibility that on these motorhomes, the fitting on the hose that connects to the LPG regulator to the LP tank is leaking at the swivel joint. A leak in the connection of an LP hose installed on a motorhome could result in a fire or explosion and serious personal injury, property damage or both.

Tiffin Motorhomes will have the LP regulator connection hose inspected and if it is found to be defective, it will be replaced with a different brand of LP regulator connection hose.

Owners will be notified by mail about the recall and will be instructed to take their motorhome to a reputable service center **OR** dealer of **their** choice to have this inspection and replacement, if needed, completed. The inspection of the hose may take up to 15 minutes. If a defective hose is found, Tiffin Motorhomes allows another 30 minutes to replace the hose and complete a leak test.
