Date: November 10, 2022

Issue: On the affected vehicles, after shifting into reverse or manually activating the parking function, the rearview camera picture may not be displayed. The rearview camera image may not meet the regulatory response time requirement. A rearview camera with a deactivated image can reduce the driver's information of what is behind the vehicle, increasing the risk of a crash or injury to people outside the vehicle.

Precautions: If the rearview camera image is deactivated while in reverse, drivers should exercise further caution when reversing the vehicle. Additionally, on certain vehicles, the system may display information that the rearview camera is not available.

- Repair:**
- REPAIR NOT YET AVAILABLE
 - Check daily campaign open inventory report or OMD for affected vehicles in inventory.
