

Hello everyone,

We wanted to come on here to remind you of a recall that was launched previously in an effort to increase the completion rate. Some 2020-2023 Ram 2500s and 2020-2022 Ram 3500s may be affected.

The recall number is ZA3. The transmission on your vehicle may experience a buildup of pressure and heat inside the transmission. This can result in transmission fluid being expelled from the dipstick tube, which may come in contact with ignition sources within the engine compartment.

Your dealer will replace the transmission dipstick and the transmission vent hose.

Please send us a private message with your VIN and dealership if you are having trouble completing this recall. The part restriction has been removed, so dealers should not have concerns when ordering parts.

You can learn more on [recalls.mopar.com](https://recalls.mopar.com), or feel free to send us a private message. We are happy to answer any questions.

Thank you,

Ram Cares
