Reason for Recall [Motivo del Retiro](#)

On certain Rogue vehicles, there is a potential for water to leak and enter the driver's side dash harness connector. If this occurs, the connector may corrode and possibly cause issues such as driver's power window or power seat inoperative, All-Wheel Drive (AWD) warning light ON, battery discharge, and/or thermal damage to the connector. Your Nissan dealer will inspect your vehicle and perform the appropriate repair below:

- If corrosion is present on the driver's side dash harness connector, the dealer will replace the connector and apply white lithium grease to the connector.
- If corrosion is not present on the connector, the dealer will apply white lithium grease to the connector.

This service will be conducted at no charge to you for parts and labor, and may take up to three (3) hours to complete if your driver's side dash harness connector requires replacement. However, your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.
